

Living Water Treatment - Connected Series

Every CONNECTED SERIES Water Treatment System is designed to specifically address the water quality issues that are unique to your home, providing your family with outstanding clean and soft water.

And, your investment will reward you with quality water at every faucet in your home. Many water supplies contain impurities, hardness minerals (such as calcium and magnesium), iron, rust, and sediment. Living Water Treatment Systems are designed to reduce these unwanted contaminants providing your family with a refreshing difference and saving you money now and in the years to come. And the best part...with the CONNECTED SERIES you are able to monitor the status of your system on any Bluetooth enabled device...anytime, anywhere!

This block contains an advertisement for the Legacy View app. At the top, the "LEGACY VIEW" logo is shown with a stylized eye icon. Below it, a list of app features is provided: "SETUP", "CONTROL", "VIEW HISTORY", "MODIFY SETTINGS", and "MONITOR WATER USAGE". A Bluetooth logo is also present. To the right is a tall, white water filter. In the foreground, a tablet displays the app's interface, which includes a clock showing 12:07 PM, a battery level indicator at 100%, and various data points: "10", "1.71", "10 GPG", and "2:00 AM". A line graph is visible at the bottom of the tablet screen. At the bottom of the advertisement, the text "INSPIRED BY TECHNOLOGY DRIVEN BY WATER" is written above the "CHANDLER SYSTEMS" logo, which is partially obscured by a graphic of water bubbles.

Benefits of a **CONNECTED SERIES** Treatment System

In the Bathroom:

Removal of man-made contaminants that can be inhaled or dermally absorbed while showering. Your soap and shampoo will lather better. Your hair and skin will feel noticeably cleaner, softer and not as dry. Additionally, there will be less soap scum or mineral deposits to clean off sinks, showers, tub and toilets.

In the Kitchen:

Unlimited clean drinking water! Dishes will clean up more easily and be spot-free, without the gray film glass tends to get when etched by mineral laden wear. Plus hands will feel softer and look better.

In the Laundry:

Clothes will be softer, cleaner, whiter, brighter, and last longer. Using soft water and pure soap products increases the life of clothing, towels and linens up to 33%. Without hard water service issues, washing machines will last longer, too.

Plumbing and Appliances:

Appliances that use water will last longer and run better. Why? Because water heaters, washing machines and dishwashers using hard water can wear out up to 30% faster.

Over time, soft water savings can really add up. For instance, conditioned water not only delivers greater washing power, it reduces the amount of soap you need to use by up to 70%. In fact, the Bureau of Statistics found that between 17 and 21 cents of every household dollar spent is on cleaning products. Soft water can reduce that bill by up to 65%. It can also eliminate extra rinse cycles and hot water use. Plus using less detergent, household cleaners and chemicals is better for the environment.

Living Water Treatment Connected Series

Whether your water source is municipal or from your own well, each Living Water Treatment CONNECTED SERIES System is designed to treat *YOUR* specific water quality issues. The very best components, features and state-of-the-art design go into every system providing you and your family with years of high-quality, conditioned water.

Legacy View Phone App

The Legacy View app makes setting up and monitoring your Living Water Treatment System easier than ever! Just download the FREE app onto your iPhone or Android device!

With Legacy View as part of the Control Valve, the user, through the app, can do the following functions:

- Conveniently view all valve setting and status
- Easily change valve settings
- View current water usage information
- Graphically view water usage history
- Start a regeneration or backwash cycle from your smartphone or tablet
- Better understand how your system is working and understand what settings are for
- Connect to all of the valves in your system (if they are all Legacy View Valves)
- The phone app also provides your servicing water treatment dealer contact information

PRODUCT FEATURES

- Simple set up through Bluetooth App
- 5 cycles, all fully adjustable
- Programming ease and options increase efficiency, save salt and water
- Treated Water-Refill with pre-brine option
- Strong, durable Noryl® valve body, weather & insect resistant one-piece slide cover
- Simple 9 volt battery back-up keeps electronic meter active and advances to shut-off position if power fails during regeneration to keep water from running to drain
- Powered Output for :
 - Full Cycle Function
 - Backwash Function
- Two valve bypass with a variety of plumbing connections are available to fit your existing plumbing
- Exclusive trademark Vortech distribution plates in the middle and on the bottom. This spins the filters so they don't solidify causing the water to bypass the filters!

Bluetooth Enabled Control Valve

- Water use is monitored for peak efficiency
- Built-in backup of settings during power outages
- Metered water usage, regenerates only when necessary saving salt and water
- Simple diagnostics and design provide for easy maintenance
- 12V DC operation
- WQA Gold Seal Certified

Highest Grade Carbons

- Gives high-quality drinking and showering water throughout the home
- WQA Gold Seal Certified against NSF/ANSI 61 *

Exclusive Softening Filter

- High-quality, chlorine resistant media bed, for years of continuous service
- Uniform bead size and distribution for optimum flow rates
- WQA Gold Seal Certified against NSF/ANSI 61 *
- 25 year warranty

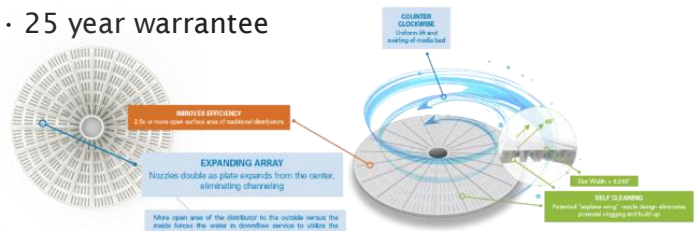

High-Quality Brine Tank

- High-quality, durable construction
- Safety float system helps prevent overflow of the brine tank
- Constructed of corrosion-free materials
- Larger brine tank sizes available
- Molded salt grid promotes uniform brining and reduces salt bridging

Distribution System

- Enpress® Vortech™ Mid-Plate Tank style distribution system, providing increased backwash efficiency using less water and saving money
- WQA Gold Seal certified against NSF/ANSI 61 *
- 25 year warrantee

General Specifications	LWT48 Fill	LWT48
Highest Grade Carbon Media	1 cu. ft.	1 cu. ft.
Softening Capacity	48,000	48,000
Maximum Raw Water Hardness (gpg)	100	100
Maximum Raw Water Iron (ppm)	5	5
Backwash Flow Rate (gpm)	3.5	3.5
Mineral Tank Size (inches)	10 x 72	13 x 54
Space Required (inches)	16 x 28 x 76	16 x 31 x 62
